How long does the life settlement process take?

A traditional life settlement transaction takes anywhere between 2 to 4 months. This time frame is highly dependent on outside parties fulfilling our requests in a timely manner, i.e. insured's medical records, policy statements, premium history and illustrations, etc. Crescent Life Settlements has dedicated departments that specialize in securing these documents expeditiously. If you require a faster process due to extenuating circumstances, we may have a simplified application program available if you qualify. Please contact us for specific details.
